

Computer SCRABBLE®

from PSION

Computer SCRABBLE® is just like the popular board game, with one exception – you now have a top level opponent, your SINCLAIR SPECTRUM computer. In this word game for one to four people the computer can take the part of any or all of them, and with four levels of skill all standards of players are catered for. At the hardest level it will beat all but the very best – and quickly. The typical response time is under 90 seconds.

Watch the computer THINK about its move and try words on the board – IT SEEMS ALMOST HUMAN, but with over 11,000 words in its memory it will have you running for your dictionary! It adheres to the published SCRABBLE® board game rules so you can trust it to add up the scores, and it will even juggle your letter tiles on the rack for you.

This high quality program with full colour graphics will provide hours of entertainment and a stiff challenge for players of all ages. The pack contains a tape cassette of the program and a comprehensive booklet describing the game – you need nothing else except your SPECTRUM 48K and cassette player.

PSION acknowledges the contribution of Peter Turcan who has worked with PSION and whose analysis of SCRABBLE® forms the basis of this program. Computer SCRABBLE® for the Spectrum has been written by PSION under licence from LITTLE GENIUS Ltd (the exclusive licensees for computer programs).
